

Disinfectant Cleaner DR

Product-Code: **1200**

DESCRIPTION

Disinfectant Cleaner DR has bactericidal, fungicide and algicide properties, as well as a large broad effect. The product cleans and deodorised in one operation. The growth of gram-positive and gram-negative micro organism is effectively prevented. Using the cleaner according the instructions, the known bacteria and yeasts (such as Pseudomonas aeruginosa Escheria coli, Proteus vulgaris, Staphylococcus aureus and Candida albicans) in the hospital area will be killed. The product meets the requirements of European quantitative suspension test for disinfectant agents. If the application of the product is done properly the existing germ content will be effectively reduced and the residual germs will be killed.

APPLICATION

General room- and equipment disinfection in food establishments, hospitals, dairies, butchers, beverage industry, agriculture, schools, kindergartens, public baths and toilets. All vestiges of organic impurities such as scraps, milk and fat must be thoroughly removed. Then rinse thoroughly with clean water and cleans with Disinfectant Cleaner DR.

- A prolonged time to act supports positively the disinfecting effect.
- Places at equipments and pipes which are difficult to access should be soaked overnight.
- Do not mix the product with other detergents.
- According DVG: unpolluted area: 1.5% 30 min. / 1.0 % 60 min.
polluted area: 3.0 % 30 min / 2.5% 60 min.
