

## eOx<sup>®</sup> Stainless Steel Cleaner

**Product-Code: 2641**

### PRODUCT INFORMATION

#### DESCRIPTION

eOx<sup>®</sup> Stainless Steel Cleaner is an industrial concentrated descaler you can remove even the most stubborn limescale. It is suitable for use in industry (scale), construction (cement veil) and sanitary facilities (removing limescale)

#### APPLICATION

eOx<sup>®</sup> Stainless Steel Cleaner can be used in condensers, heaters, boilers, steam boilers, cooling towers, evaporation condensers, heat exchangers, pipe systems of industrial environments and industrial installations (including the food industry). The product is also suitable for processing in ultrasonic installations and immersion (rinsing) machines. Applicable to all metals, including light metals, such as aluminum, zinc, copper and the like. However, the exposure time should be limited with light metals.

#### INSTRUCTIONS

When first applied, it is always wise to test the material in a less visible place. The concentration to be used depends on the nature and degree of the contamination, the processing equipment used, as well as water pressure and temperature. The product can be diluted 1:3 to 1:10 with water, applied at temperatures of 50 - 70°C. Pour the solution into the system or device, then follow the instructions for use for the equipment. In case of heavy soiling, it may be necessary to repeat the treatment. When used in pipe systems, circulate the desired solution. After cleaning, rinse the used equipment with plenty of water.

SPECIFICATIONS	
Usage Temperature	Special intensive industrial concentrated descaler for multiple objects
Storage Temperature	Not critical
Solubility in Water	Frost free
Flashpoint	Fully
pH-value	--
Waste information	1.03
	Removal as waste according to local and national prescriptions.

**Package:** 25 L. Jerrycans - Barrel 210L – IBC 1.000L  
**Shell life** 4 years
