

DESCRIPTION

eOx TGV Cleaner is a very powerful industrial cleaner. Removes traffic film, brake dust, dirt, grease and other similar soil from the body work of rail carriages. This liquid is a specialty cleaner developed for the exterior cleaning of train wagons and locomotives. The product is non- flammable, non- toxic and biodegradable. **eOx TGV Cleaner** has no negative effects on the working of oil / water separators.

APPLICATION

Use **eOx TGV Cleaner** in its concentrated form to remove extreme contaminations of the bottom part of the locomotives and train wagons as well as for the cleaning of lubrication/ inspection pits.

Dilute up to 1/4 for regular cleanings and for the complete wash of the train wagons. Moisten the surface with the (diluted) product and brush in. Let it work for 1 to 3 minutes, rinse the surface with plenty of water (or use a high pressure machine) During summer period, the product will dry up quickly. Therefore we recommend to cool down the surface with water prior to applying the product.

REPLACEMENT FOR

eOx TGV Cleaner is a replacement for: (aliphatic) hydrocarbons, thinner, petroleum, etc.

CLEANING METHODS

eOx TGV Cleaner can be applied manual or with high pressure. Start from the lower sections of the carriage and work up towards the roof. If necessary, agitate the surface with a soft brush to loosen tenacious soiling matter. Rinse off using a high pressure working down from the roof.

SPECIFICATIONS

Appearance Colorless/hazy light
Specific Weight at 20 ° C. + 1
Storage Temperature Frost free
Solubility in Water 100 %
Flashpoint > 200 °C.
Danger Class None
PH (sol. 20 ml/l) Ca. 12,5

Package: 25, 210, 1.000 Liter

Shell live: 4 Years storage, frost free
